Re: Request for Additional Information
        Current Width of Stream to be Impacted
        AI No.: 34051
        Centertown Water System
        Activity ID: APE20100003
        Elk Creek
   Ohio County, Kentucky

To Whom It May Concern:

The Kentucky Division of Water has received the Application for Water Quality Certification submitted for the above-referenced project. The linear feet of stream to be impacted by your proposed project have been identified as 40 linear feet. For proposed utility line activities, the present width of the stream to be impacted by the project identifies whether your proposed project will require an individual Section 401 Water Quality Certification to be issued by the Water Quality Certification Section of the Kentucky Division of Water, or if we may issue a pre-determined general permit, which is specifically designed for utility line projects. The following information is needed to complete our review:

- Please inform us of the current width of Elk Creek at the proposed water main crossing.
- Please inform us of the actual linear length of stream that will be cut, trenched, or impacted by the project below the Ordinary High Water Mark (OHWM). The OHWM is usually identified by the elevation where vegetation begins to grow above the water level.

All future correspondence on this project must reference **AI No. 34051**. If you should have any questions regarding the contents of this letter, please contact (502) 564-3410, or email adam.jackson@ky.gov.

Sincerely,

E-Signed by Adam Jackson
